

Ultra-Height®

Sunrise at Lake Winnisquam

Ultra-Height® is a Level of Expanded Mental Awareness

Ultra-Height® is a method of hypnosis that guides the mind into levels of heightened awareness and readily obtains knowledge and insight to physical, emotional and behavioral difficulties.

A truly beautiful, wonderfully blissful and peaceful method for healing, exploration and discovery is Ultra-Height®. It is a modality developed by Gerald F. Kein, director of the Omni Hypnosis Training Center. Ultra-Height® is a powerful and versatile method that allows you to open to extraordinary levels of mental awareness and readily obtain knowledge and insight to your physical, emotional and behavioral difficulties. While in these levels of profound mental alertness and activity, the powerful inner mind is capable of quickly finding the root cause of a difficulty as well as learning the best way to correct the difficulty.

PEACEFUL LIGHT HEALING @ LAKES REGION HYPNOSIS

A person in Ultra-Height® can experience a beautiful and very deep relaxation throughout their body while the inner mind works to meet the healing needs. In addition, because a person is in a highly receptive state, deep and lasting healing is extended to the whole energy system and structure.

Moving into this profound level of mental awareness is possible for everyone. The only requirements are to have a great desire and then an expectation and full commitment. It cannot be forced or pushed but needs to simply be allowed to happen while being guided by the hypnotist.

The transformation of the powerful inner mind can create is virtually limitless. With each successive session you are able to move into levels of expanded mental awareness with more and more ease, gain more insight and create more healing change in any area of your life. The beauty of Ultra-Height® is that there are absolutely no dangers, as it is a totally positive, joyous and loving experience.

WITH ULTRA-HEIGHT® YOU HEAL YOURSELF

We do not replace, nor do we advocate replacing a client seeking the advice of a healthcare professional, i.e. doctor, specialist, psychologist, etc. In fact we recommend that your healthcare specialist be made aware of your “seeing” us, and welcome that professional’s input if she/he is so inclined or “needs” to be made aware of the process (this would require a signed release from the client and from the healthcare professional).
